

# Munters ONE

## Climate Controller

Munters ONE is one of the most advanced climate control unit of the poultry industry, providing farmers with vastly expanded management and control capabilities.

### Advanced management and security

- Extra large, easy to use touch screen simplifies configuration, control, and farm monitoring
- Remote access via Web, Cloud, or a smart-phone along with real time alarms
- Multi-language support

### Made for poultry business

- Improved software capabilities support an unlimited number of devices and scales
- New heavy duty enclosure simplifies installation and maintenance
- Supports Munters Drive

Munters ONE

Modern agriculture demands constant optimization of production and accessibility from anywhere, anytime.

Munters ONE responds to these market demands, taking the user experience to a simple yet advanced level.

ONE features an enlarged 15.6" screen with an intuitive, easy-to-use interface that brings all the advantages of touch screens to the farm.

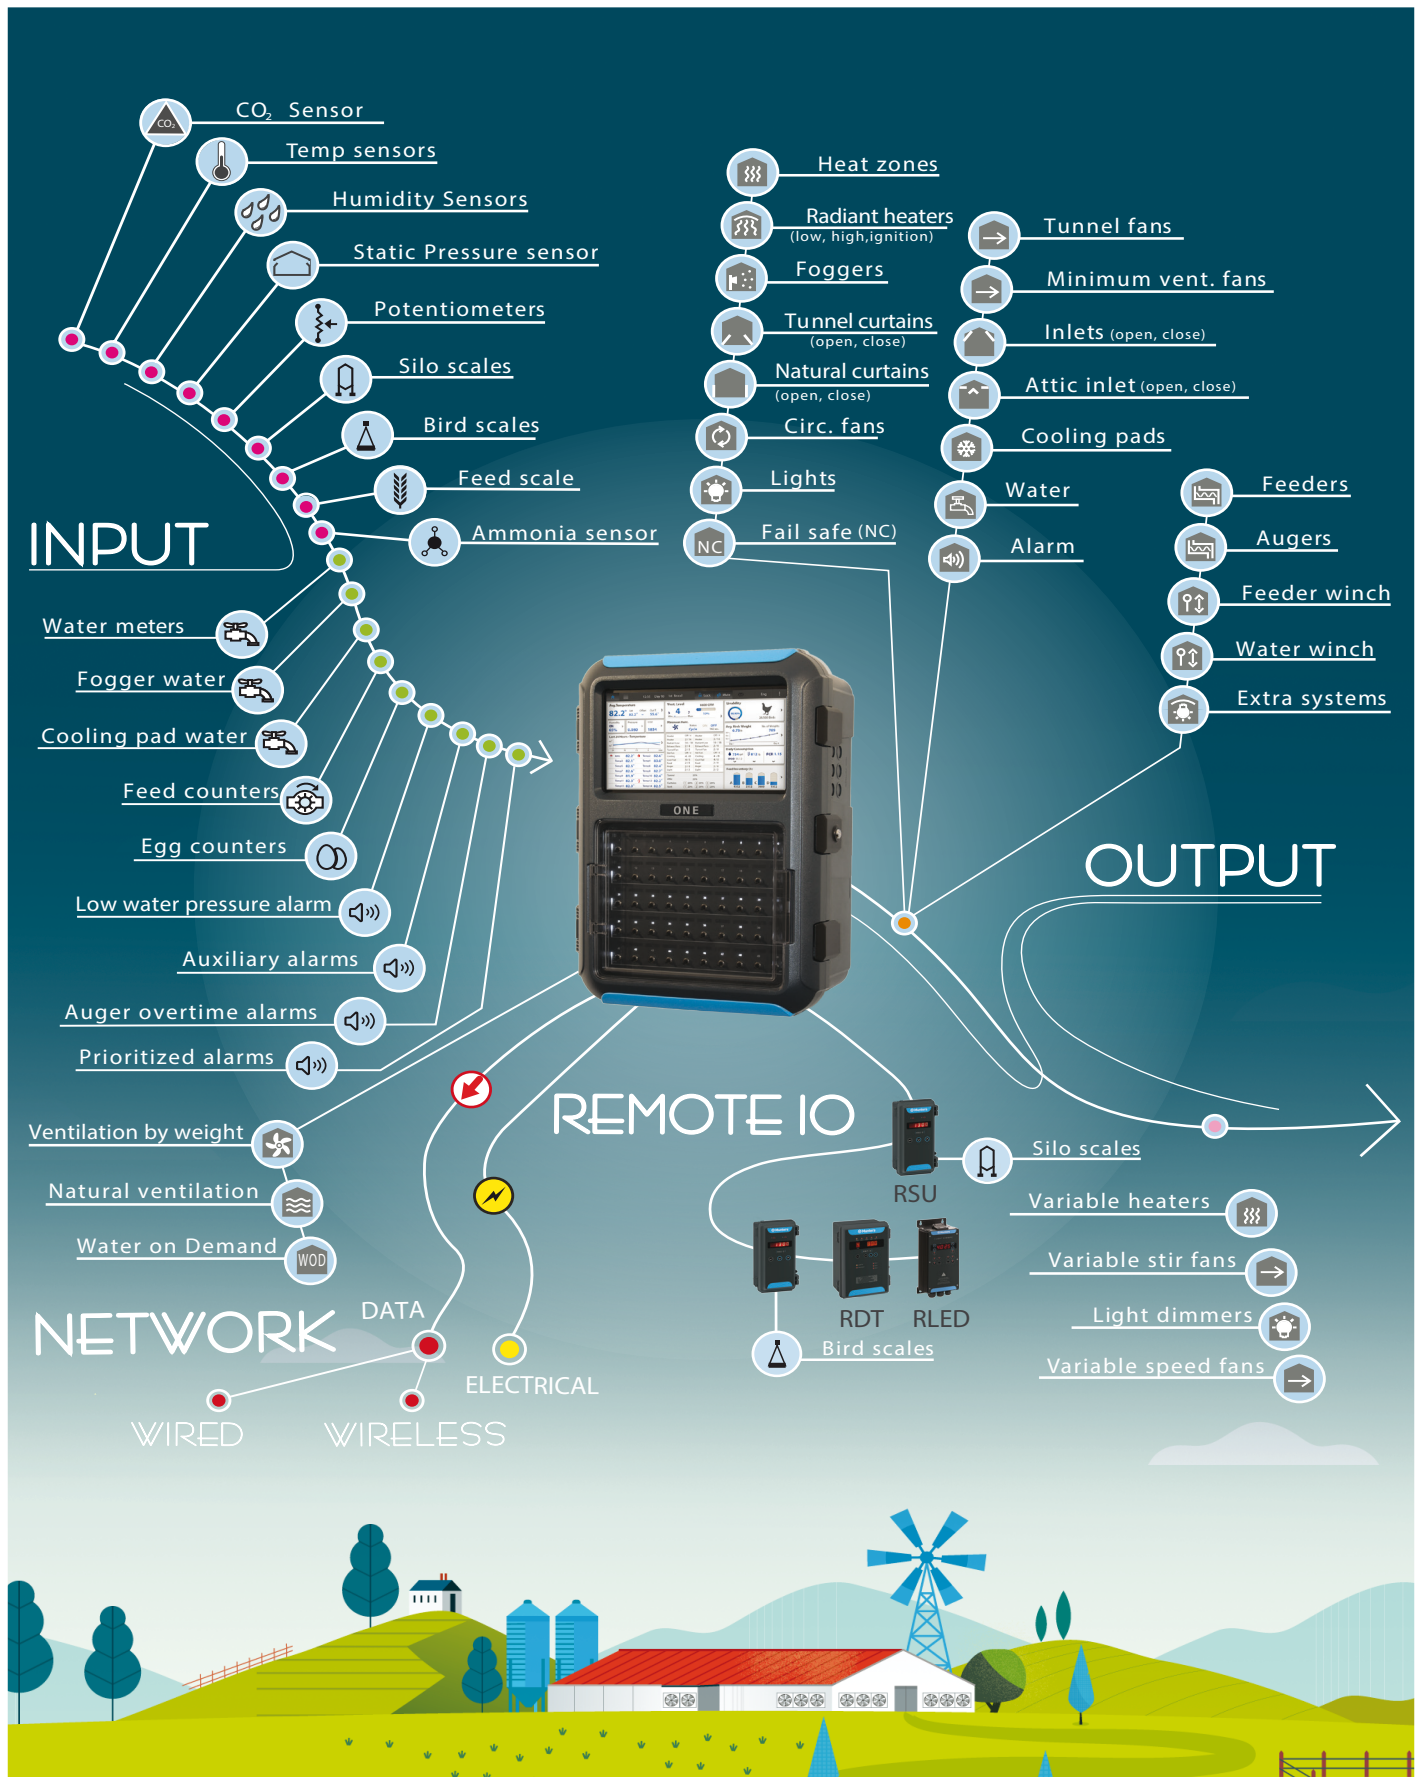

ONE modular architecture enables a high level of flexibility in its system design, supporting a large number of devices and up to 200 2HP heavy duty relays (including expansion units). Its improved software guarantees successful critical missions, with smart On/Off/Auto override switches, 16 independent heat zones, precision fogger and evaporative cooling system, an SD card, and ARM CPU.

Munters ONE enclosure is designed to facilitate installation and maintenance, while a switch guard door keeps toggle switches securely in place.

Munters Communicator 2.0 acts as Munters ONE communication interface, enables remote access, control, and an alarms package.
