

Product sheet
Communicator 2.0

- Advanced Alert System: real time notification of the exact problem and location
- Backup battery and diagnostic package: safe operation in case of power outage
- Full control of the farm, remotely, from any device, anywhere
- Multiple-users, fast & reliable connectivity from any device: communication taken to the next level
- Web, Cloud, cellular and LAN connectivity to ensure use and access even without an internet connection

Complete Control at Your Fingertips

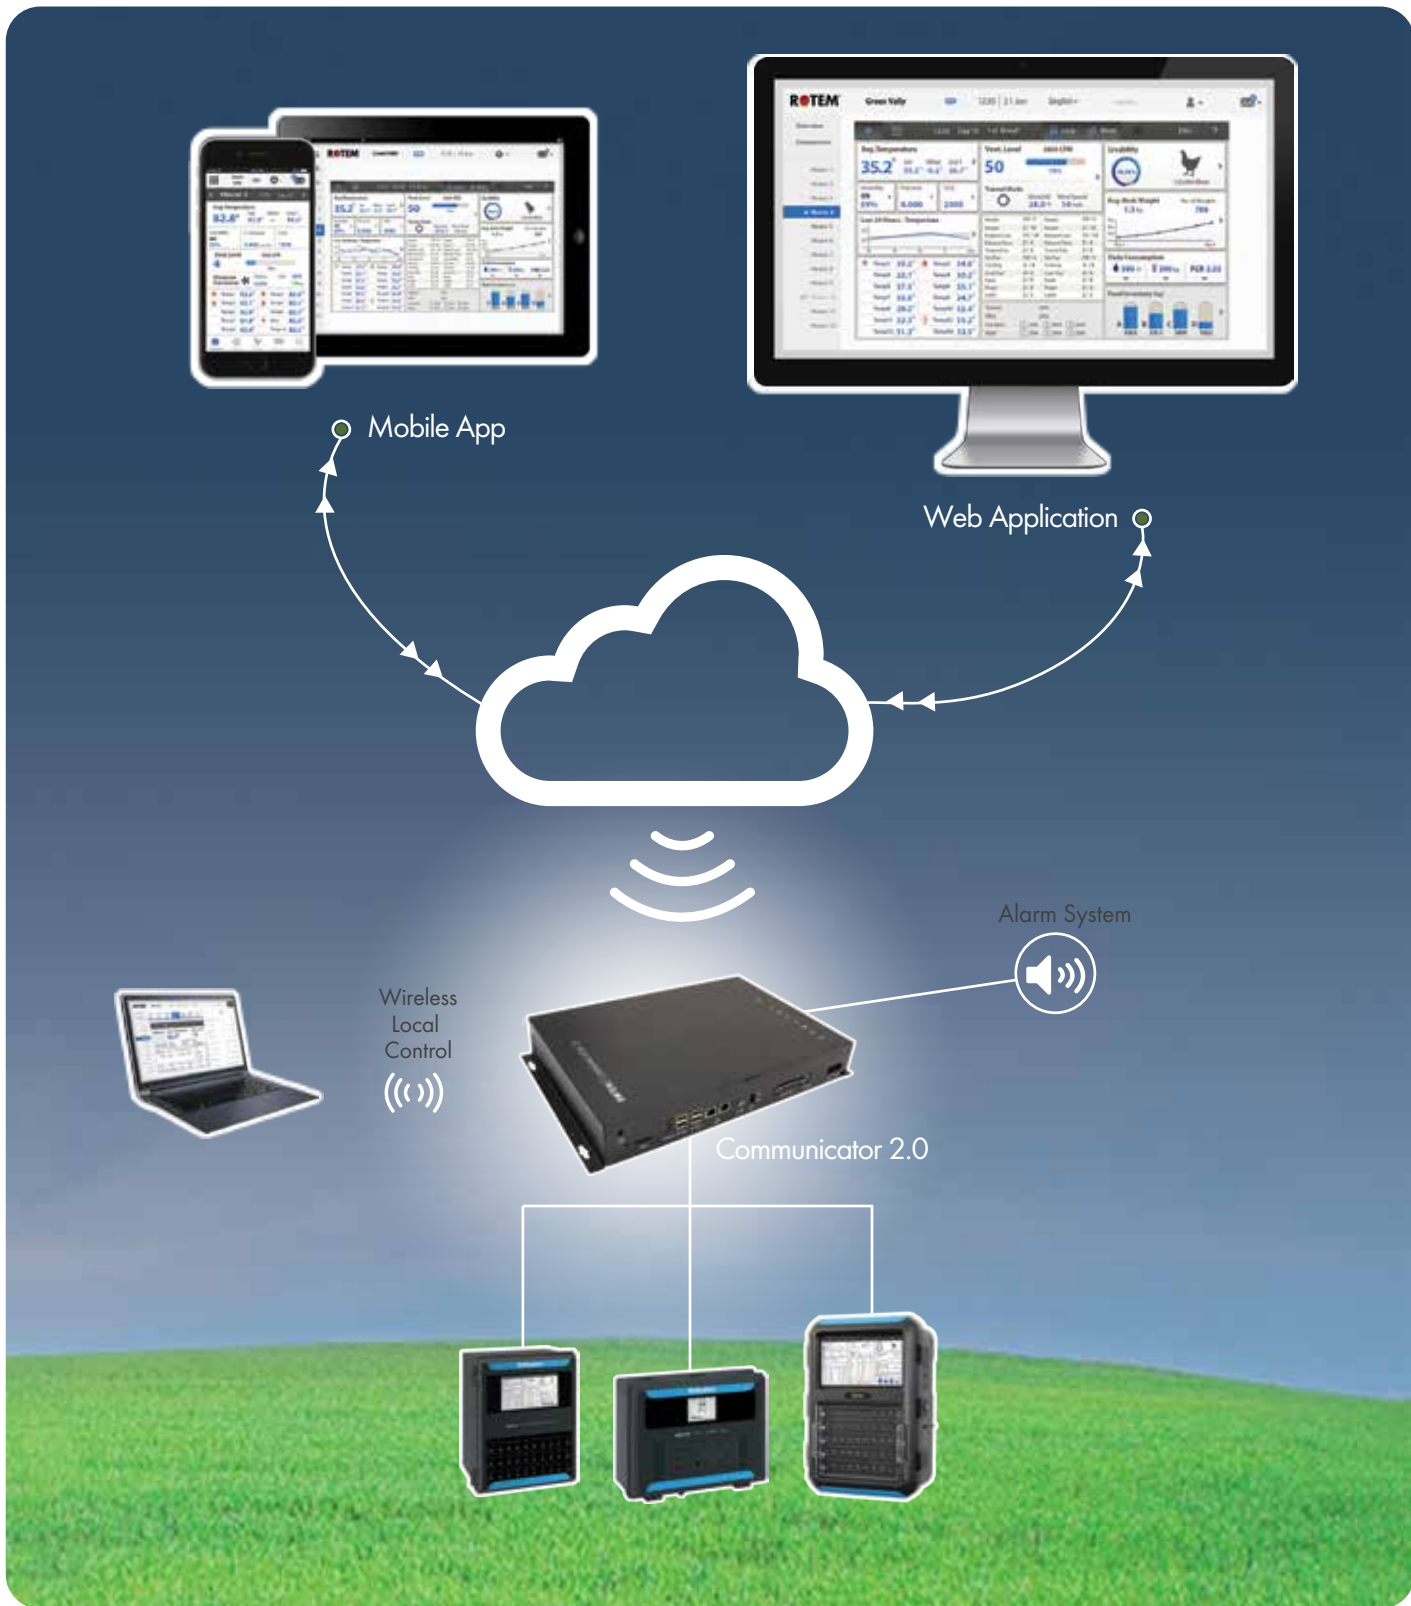

Munters' Communicator 2.0 is the next step up in farm control, providing an extensive alarm package along with remote access to your farms' controllers via the web. The alarm package provides vital information to you and your staff in real time regarding any event or problem that may arise on your farm. Along with providing crucial information, Communicator 2.0's alarm configuration and management software is feature-rich, yet simple to use. Delay times, number of repeated messages, daily tests, push notifications, messages, voice mail - these are just a few of Communicator 2.0's many features. In addition to the alarm package, Communicator 2.0 features a battery power backup system, guaranteeing continuity of service in the event of a power outage. This essential feature ensures that you continue to receive alarms in any situation.

The web and cloud-based technology enables access to multiple and simultaneous users, along with different access levels (view only, partial access, full access, and administrator). The Communicator 2.0 has multiple communication pathways, including built-in internet and phone connectivity and an optional cellular modem, to ensure connection if internet is not available.

The desktop and smartphone application guarantees easy and user friendly access to information, such as analytics, animal performances, and equipment status. A full diagnostic package aids users and tech support if any issues (such as connectivity) come up. Front panel LEDs facilitate simple trouble shooting.
