

Product sheet  
Pivot Air System

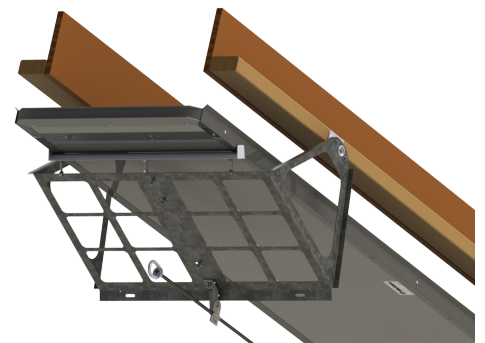

- Complete package, from Actuator to Baffle.  
Componets include: IA - PipeDrive System, Transition kit, Pivot Risors and Baffles
- 12" and 20" Slot sizes
- Easy to install and adjust
- 1" high density foam wrapped in corrugated PVC Baffles
- Rubber seal to keep out draft
- Solid rod Risor connections to eliminate stretch to assure tight closure
- Custom engineered pivot point for smooth operation
- Designed to work with IA - Pipe Drive System

## Pivot Air Inlet System

The Pivot Air Inlet system is designed to give the grower precise control over incoming fresh air.

The complete system is designed to combine the NEW Pivot Air Inlets, the IA Actuator along with the Munters PipeDrive. The IA Actuator and PipeDrive provide inline control of each run of the baffled inlets. The transition kit connects the PipeDrive to the baffle and includes a hand winch for manual override if needed. Smooth operation of the newly designed pivot points provide precision movement when opening and closing the inlet. Each baffle row uses a solid rod pull along the entire length of the system, eliminating potential issues with traditional cables. Each baffle is constructed of 1" thick density foam wrapped in corrugated PVC with an intergrated flexible rubber seal. Munters Ventilation Engineers designed the Pivot Air System to maximize the performance of a complete Munters Ventilation System.

# Pivot Air Inlet System

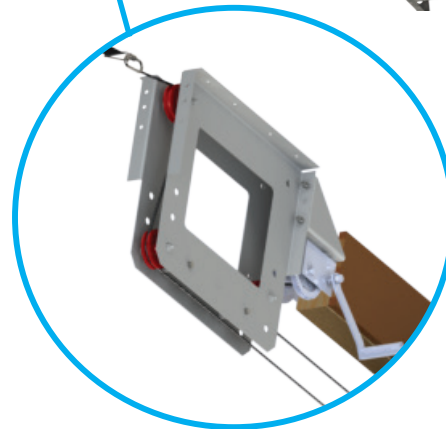

- Actuator designed for use with Pivot Air Inlet System
- Premium actuator with heavy weight capacity
- Multiple runs with single actuator

- Belt and drum in-line connection, eliminates complex pulleys and cables

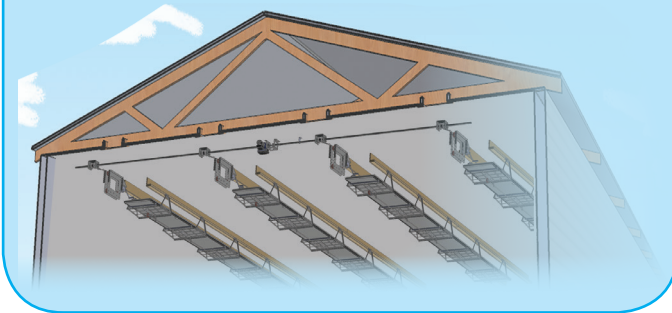

- Engineered Pivots for smooth Inlet movement

- Transition End kit can accommodate 1:1 cable or double back cabling set-up. Includes hand crank.

Inlet and drive designed to work together for precise inlet airflow and tight draft free closure. Designed by the Ventilation Experts to work with the complete Munters Premium Ventilation System.
