

GREEN JET

Fertilizer/Acid Dosing Unit System

FEATURES

- Flexible/Modular fertigation system
- Suitable for soil and soilless media crops
- Minimal capital investment
- Reduced water, fertilizer and energy consumption
- Very high level of EC and pH control
- Nearly maintenance-free Venturi operations
 - No moving parts
- Easy to install and maintain the system
- Comprehensive application coverage, including greenhouses, open fields, orchards and more
- Highly profitable price/performance ratio

CAPABILITIES

- Montres Fertilizer injectors perform real-time monitoring and control, while providing the best possible plant nutrition under any growing conditions. These units deliver the most accurate fertigation possible by:
 - Controlling the fertilizer relative to the amount of water
 - Simultaneously measuring and adjusting the EC PH values exactly to the level the plant needs for optimal growth
- This technology is backed up by vast technical knowledge gained through decades of experience in the agriculture industry.

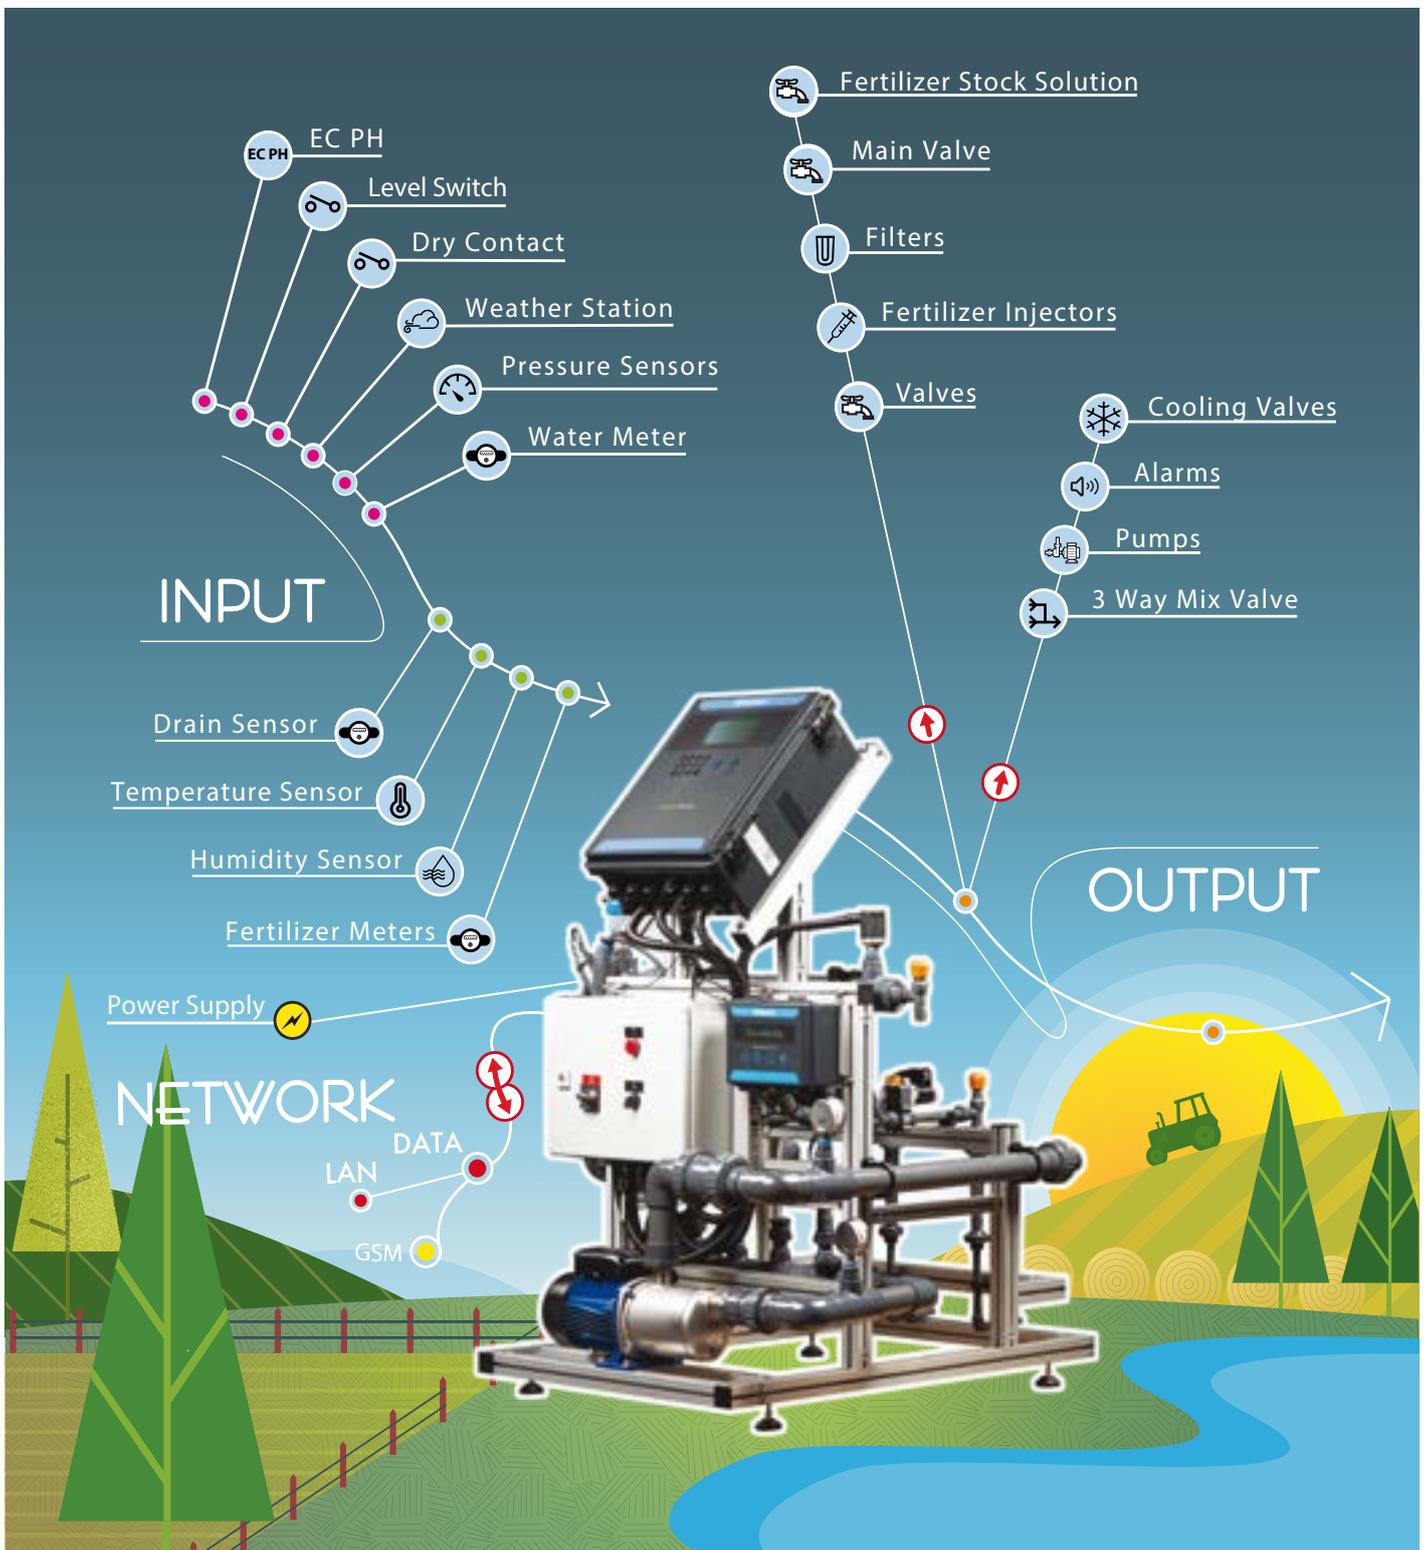

Green JET

Green JET is a fully configurable, cost-effective fertilizer/acid dosing unit system that precisely and accurately injects fertilizers according to field/plant requirements.

Requiring minimal capital investment and operating in any site conditions, Green JET optimizes the main irrigation lines' available water flow rate and pressure to ensure maximum efficiency.

Components:

- Quick-action dosing valves
- Wide range of integrated accessories and peripherals
- High-quality components and PVC piping
- Corrosion-resistant aluminum frame
- Stainless steel pump capable of handling any type of fertilizer and acid
