

Get better control of your ML dehumidifier

ML2E control conversion to AirC400

This conversion kit can be used with ML420E, ML690E, MLT800E, ML1100E, ML1350E, MLT1400E.

ML2E control conversion to AirC400

Extend the lifetime of your ML dehumidifier with a new AirC400 controller

If you own a ML dehumidifier* delivered from 1996–2023, Munters suggests you take preventative action and convert your well-functioning ML dehumidifier with a new AirC400 controller.

The equipped PCB control module is obsolete, and no direct replacement is available if it breaks down. To avoid unplanned downtime and extend the lifetime of your ML unit, Munters recommends that you convert your control system with our ML2E series AirC400 conversion kit.

Tailor-made to perfectly fit your ML unit*, the AirC400 controller offers cutting-edge technology, featuring an intuitive user interface and multilingual options. This ensures seamless integration and a user experience that is both familiar and user-friendly.

AirC400 optimizes energy efficiency and control, enhancing the performance of your ML dehumidifier*. It also complies with the original CE marking on the unit.

You can trust Munters certified quality and decades of expertise. The conversion process is streamlined and efficient, carried out by our experienced service technicians in just one day. But since we tailor each conversion kit to the specific needs of our customers, please plan for this conversion to ensure uninterrupted operations.

With decades of experience leading the dehumidification industry, we know what it takes to ensure the perfect climate for our customers. Trust Munters, convert today to keep your ML unit running like new!

The new AirC400 controller has an easy-to-use interface, while keeping its original CE marking on the unit.

The equipped PCB control module on ML420E, MLT800E, ML690E, ML1100E, ML1350E and MLT1400E dehumidifiers delivered from 1996 – 2023 is obsolete.

* This conversion kit is designed for ML420E, MLT800E, ML690E, ML1100E, ML1350E and MLT1400E units delivered from 1996 – 2023.

AirC400 benefits

- → Automatic modulation to ensure optimized energy efficiency
- → Easy-to-use software system presented on a full-color display
- → Multiple language options
- → Scheduled maintenance notifications
- → Enhanced communication capabilities
- → Munters connectivity capabilities

Conversion benefits

- → Avoid unplanned downtime
- → Stay up to date with the latest technology
- → Improve energy efficiency and control
- → Tailor-made solution built to Munters standard of performance and reliability
- → Retains CE marking
- → Quick 1-day conversion process
