- Munters Drive Compatible
- Large 16 line LCD screen
- 1 Box system
- Unmatched lightning protection
- Current building conditions shown on screen
- User defined hot keys
- Installer password can be set for protection
- USB jump drive to save and load settings
- Saves history menu's on USB
- Available message center
- 4 seperate programs for stages 1-6
- Dusk til dawn lighting program
- Up to 10 water meters with water spill alarm
- Control 2nd room heater and fan
- Clean out mode
- Soaking timer

CC247 Ultra Plus Control

The Ultra Plus, CC24-7 series environmental control, offers around the clock performance. The CC24-7 Series is designed with a user friendly interface, expandability and many other features which make it the ultimate building management tool. The Ultra Plus offers a one box, easy installation and user friendly control.

The controller is compatible with a variety of accessories that will further enhance your building management. Humidity sensor, static pressure module, backup relay box, water meters, and the Agri-Alert alarm system are a few of the accessories.

Munters

Additional Ultra Plus Features

Safety features:
- High & low static pressure alarm
- High and low temp alarm
- Water spill alarm
- Feed over run alarm
- Individuale Probe alarms

Track History: (180 days)
- Temperature Hi/Lo
- Heater Run Time
- Relative Humidity Hi/Lo
- Static Pressure Hi/Lo
- Daily and total Water Consumption
- Feeder Run Time
- Animal Mortality - Daily/Total

Start / Stop Temperatures:
- Summer Start/Stop temperatures
- Night time set-points
- Winter Start/Stop temperatures adjustable for each fan, cooling & heating stage
- Minimum ventilation ramping and compensation
- Curve for Temperature and Minimum Ventilation

Vent Doors & Tunnel Curtains:
- Static Pressure, or timer for Vent Doors, second Inlet and Tunnel Curtain
- 10 Inlet controls, timed or Poteniometer
- Pre-opening of Vent Doors, Attic & Tunnel Curtain

Natural Ventilation:
- Up to 4 natural outputs
- Can run 4 independent zones

Outputs:
- 16 Stages of Fans for Cooling
- 8 Stages of Heating
- 8 Clock Outputs
- 2 Variable Speed Outputs
- 2 independent 0-10V Outputs
- Tunnel Curtain
- Vent Doors
- Alarm Contacts

Inputs:
- 8 Temperature Sensors
- 1 Outside Temperature Sensor
- Relative Humidity
- 2 Water Meter
- Static Pressure built-in
- Computer Compatible with Interface
- 2 Feeder inputs

Ultra Plus Relay Features
- Pre-wired Relay Panel
- Three way ON/OFF/AUTO switches on relay panel
- Up to 30 heavy duty relays

Accessories
- Agri-Alert Alarm System
- Humidity sensors
- Backup relay box
- Water meters
- Inlet Controls - SB3xxx
- Light Dimmer
- DI-8, adds up to 16+ water meters

Agri-Alert System

Agri Alarm systems are designed to detect common site problems and failures, and to Quickly and reliably communicate them to those who need to know .
