

## MX controls conversion to Climatix

### BENEFITS

- Avoid unplanned standstill
- Change to modern controller
- Many extra features for exact and energy efficient operation
- BMS control possible
- Minimised downtime during upgrade performed by specialist
- Complete kit with new front panel

 **Munters**

MX7600

MX Control conversion to Climatix -  
for improved energy efficiency and control

# Why not avoid an unplanned stand still of your MX dehumidifier?

Take preventative action and convert your well functioning MX dehumidifier with a new Climatix controller.

The conversion will offer you a big variety of modern features that will not only open up for a more energy efficient operation of the unit, but will also allow for controlling the unit by your existing BMS.

Operating one of Munters' good old work horses, the MX dehumidifier with integrated DDC control, provide you with a long lasting air treatment solution with a number of upgrade options.

The DDC controller of the MX series has served its purpose very well over more than two decades, but does not have the features of a modern controller. With components becoming obsolete, Munters is no longer able to replace the DDC controller.

The controller conversion kit is being manufactured on demand, fitting the specific configuration of your MX unit, which naturally will imply some lead time. We therefore recommend you to plan for the intervention, avoiding downtime in case of a sudden controller breakdown.

## Advantages by Climatix conversion:

- Specially programmed by Munters, offering multiple communication solutions to management systems
- Connection to existing BMS via up to 3 communication modules, Modbus, BACnet and LON.
- Easy menu system, available in many languages.
- Easy readable text display with read out of all available configurations, settings and alarms
- Datalogging
- Multiple temperature and humidity sensors can be connected allowing for more exact control
- A number of alarm options allows you to take timely action and prevent/reduce standstill
- Web interface for IoT connection with Munters Connected Climate •

Initiate the conversion well in time and avoid unpleasant downtime that might have a negative impact on your production capacity and product quality. Our specially trained service engineers will convert your MX dehumidifier normally within only one working day.

For more details and scheduling of conversions contact your local Munters Service Team.
