

# Munters wins order of BSEK 2.0 for a modular AI cooling solution

Munters business area Data Center Technologies (DCT) has received an order worth appr. BSEK 2.0 from a colocation data center provider in the US. The order includes custom-designed high capacity CDUs (coolant distribution units) and over the rack CRAHs (computer room air handlers) with deliveries expected to start in early 2027 and extend through the first quarter of 2028.

Munters Group, a global leader in technologies that optimize climates, has received an order from a colocation data center customer in the US through the business area DCT. The total order value amounts to approximately BSEK 2.0. Munters will provide a new cooling platform specially designed for an AI factory build-out including both high capacity CDUs as well as CRAHs that are placed above the server racks. The order will be included in the order intake for the second quarter of 2026.

"Rapid adoption of AI and high-performance computing is driving a fundamental need for new digital infrastructure, which has materialized as a clear acceleration in demand. This project exemplifies how tailored high efficiency solutions serve as a key commercial differentiator – and how we can scale these customizations to industrial volumes. It also demonstrates DCT's ability to win in a segment marked by intense competition and rapid technological shifts," says Klas Forsström, President and CEO of Munters.

"This confirms the continued confidence in our ability to support high-density AI factories with both air- and liquid-cooled solutions. The solution provides an innovative and fully modular approach that cools an entire AI skid – a solution enabling our customer to deploy AI infrastructure rapidly and at scale," says Stefan Aspman, Business Area President DCT and Group Vice President at Munters.

## About Munters

**Munters Group** is a global leader in technologies that optimize climates, contributing to productivity, quality and resource efficiency in a wide range of industries. Our portfolio includes solutions for humidity control, air and liquid cooling, air purification, controllers and software – products and services that are key to safeguarding mission-critical processes. Headquartered in Sweden, Munters has around 5,000 employees and operations in more than 30 countries. Munters Group AB reported annual net sales of approximately SEK 15 billion in 2025 and is listed on Nasdaq Stockholm. For more information, visit [www.munters.com](http://www.munters.com).

**Munters business area Data Center Technologies (DCT)** is a technology-leading provider of advanced cooling systems for data centers, with a full range of heat rejection technologies that cover liquid and air cooling needs. DCT offers scalable solutions based on leading application expertise, to drive progress in the data center industry and enable a sustainable expansion of digital infrastructure worldwide. In 2025, DCT had approximately 1,000 employees and reported annual net sales of around SEK 6 billion.
